

blue cohosh

Caulophyllum thalictroides

FEATURES

The flowers of blue cohosh are six-parted and are green-yellow to brown. The fruits are dark-blue berries. The leaves have seven to nine leaflets. A single plant may be one to three feet tall

BEHAVIORS

Blue cohosh grows statewide in moist woods. Flowers are produced in April and May. The flowers attract pollinators, and the fruits are eaten by wildlife, particularly birds.

TAXONOMY

Kingdom: Plantae
Phylum: Magnoliophyta
Class: Magnoliopsida
