

*(Handwritten scribbles)*

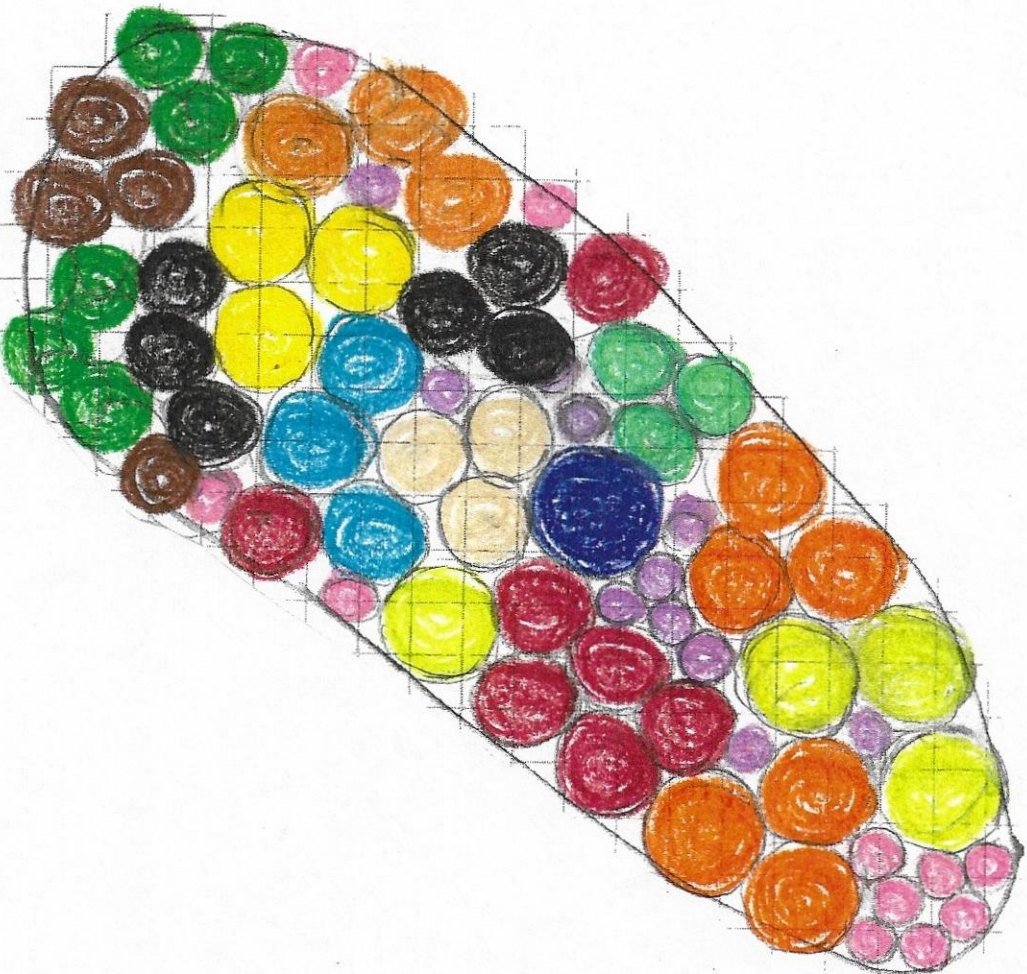

E

Our garden consists of two beds, each a kidney-shape that is 10 feet across at the widest and 23 feet long at the longest. The EAST (E) bed is depicted here; the E and WEST (W) beds will be mirror images of each other in terms of layout. To accommodate more student plant choices, some plant choices will be different in the E and W beds, as described in the Key below.

KEY  
 = 1 square foot

 = South

-  = Prairie dropseed
-  = Prairie smoke
