Cunningham		Pontoosuc	
		Putman	

Note: Regulations define "economic distress" as: lacking a major university, receiving less than the per capita fair share of OSLAD funding from 2002-2023, having low EAV per capita relative to the state average, and having a high share of its population in poverty.

Population data (for per capita calculations) and poverty data are 2022 American Community Survey 5 year estimates for various geographies that match or nearly match district boundaries. Park districts can be any one or more of the following: census tract, place (municipality), county subdivision (township), or county. Forest preserve districts are always counties. Municipalities (cities, villages, towns) are census places. Townships are census county subdivisions.

EAV data are from Illinois Department of Revenue Taxing Statistics for 2021, Table 28. District EAV, CTE and Total Rate by Property Class. Available at <https://data.illinois.gov/dataset/2016-property-tax-statistics/resource/394f5ee6-1db7-4794-8ae3-7599815a94d5> (last accessed July 23, 2023). EAV were extracted for only counties, townships, municipalities (cities, villages, towns), park districts, forest preserve districts, and conservation districts.

OSLAD (prior IDNR funding) data are available as internal records with IDNR.
