2. Project objective described in the application and Grant agreement:

Purchase and install fifteen 9"x12" interpretive trail signs along the one-mile hiking trail within Green Earth's Pyles Fork Preserve. Each sign uses line art and descriptive text to discuss natural ecology, habitat, and wildlife found within the site.

3. Completed project description:

Because the cost of the 9"x12" interpretive signs increased from the time of the vendor quote until the time of purchase, twelve signs were purchased instead of fifteen. The twelve signs were mounted onto angle cut 4"x4" posts which were placed along the one-mile trail.

4. Summary of the Project accomplishments (if applicable):

The addition of the interpretive signs supports Green Earth's mission of providing environmental education along with access to natural areas to the public.
